

HOW TO CLEAN A STAIN ON A TPE LOVE DOLL

TPE is a material that can easily get damaged by clothes if they are used wet or for a too long time. Especially darker colours.

WM Dolls as developed a TPE Stain remover that only require times. Just remind that this kit works best for clothes stain, if the colour is to strong (paint, permanent marker), it might not work as well as presented below.

Same for all repair job, work on a clean doll, remove all dust, hairs anything that can prevent the stain remover to work well.

The Stain Remover is a small pot of white cream.

Realistic Love Doll

Apply the cream on the area you want to clean

If you use your fingers to apply wash carefully your hands after working on the doll. We recommend to use Latex Gloves to protect your skin.

After 4 hours you can see the colour starting to fade away !

Realistic Love Doll

After 24h, the stain is gone ! without damaging the doll. !
